

FACTS ABOUT SPRING

1. The first day of spring is called the vernal equinox. The term vernal is Latin for “spring” and equinox is Latin for “equal night”.
2. The fall and spring equinoxes are the only two times during the year when the sun rises due east and sets due west.
3. On the first day of spring a person at the North Pole would see the sun skimming across the horizon, beginning six months of uninterrupted daylight. A person at the South Pole would see the sun skimming across the horizon, signaling the start of six months of darkness.
4. Easter always falls on the first Sunday after the first full moon after the spring equinox.
5. The first spring flowers are typically lilacs, irises, tulips, daffodils and dandelions.
6. The first day of spring in the southern hemisphere is the first day of fall in the northern hemisphere.
7. Children actually grow faster in the spring than during other times of the year.
